

Local kids need local foster carers

Your care can make all the difference in a child's world.

*"After being a foster carer for 11 years, I wouldn't change my life for anyone's,"
- Foster Carer*

"Every day foster carers play a vital role in our communities. We need more foster carers for children and young people."

- Children need foster care when they can't live at home anymore
- Help children to remain in their local area with access to familiar interests like sport, school friends and relatives
- Respite Care provides full time foster carers with a short break and is a great way to experience foster caring
- Respite care can be from one weekend a month to school holidays and long weekends. Your commitment is whatever will work for you.
- ac.care provides specific training and 24/7 understanding and professional support for all foster carers
- Today's foster carers are male or female, single, couples, with or without children, work full time or part time, unemployed, retirees or students (aged over 25)

You can make all the difference in a child's world by becoming involved in today's foster care
